

Test Summary: Verify that user is able to cancel single passenger from a ticket which is booked for multiple passengers.	
Test Description: This test case will validate that if there are multiple passengers are traveling through a single ticket(PNR), they can cancel single passenger ticket also.	
Prerequisite: A single ticket is booked for multiple passengers and date of journey is 70 days from current date.	
Steps	Expected results:
1. Log in to Application and goto Booked history / Transaction History Or My Ticket orders	All the booked tickets should be displayed
2. Select the ticket which contains the ticket for multiple passengers and journey date id after 70 days	Check boxes for all passengers should be displayed to cancel one or multiple passenger.
3. Select one passenger out of all the passenger. Click on cancel button	Prompt message to confirm the cancellation
4. User confirmed the cancel	User should get an email/message for successful cancellation. User should get the email with the amount which is refunded. Refund amount should be 70% of the passenger ticket amount. Example – If single ticket was of R 1000, User should get an refund of Rs 700.
