Test Summary: Verify that user is able to find the desired ticket to be cancelled.

Test Description:

This test case will validate that user is able to find the desired ticket(in case when the ticket is RAC or Confirmed Booked Ticket) to be canceled

Prerequisite:

User has valid credentials ,he has logged in and cancel button is working properly

Steps	Expected results:
1. Log in to Application	With valid input should redirect to user home page and with invalid input it should prompt user for invalid credentials
2. Click on the cancel button	It should redirect to Counter Ticket Cancelation
3. At Counter Ticket Cancelation	It should display list of all the booked tickets
4. Search for ticket to be cancelled	Search for booked ticket on the basis of PNR number
